In This Workshop You Will Learn How To:

- ⚙ Take accurate measurement to get accurate results, and avoid the hit or miss approach of the untrained astrologer.
- ⚙ Prep the Map to visually indicate those areas that are most favorable and those that are clearly not.
- ⚙ Use the Latitude Crossings to fine tune the best areas and discover those that are even better.
- ⚙ Interpret the planetary lines, and do a Risk Assessment to determine the pros and cons of each line.
- ⚙ Discover how planetary line reflect changes in health, relationships, and over all quality of life.
- ⚙ Transpose the final results onto a World Atlas to see the cities and varieties of topography that are included.
- ⚙ And much more.

This is a hands-on Workshop giving each student the opportunity to prep and interpret their own A*C*G Map.

For the professional astrologer this is an opportunity to add A*C*G Map consultations to their menu of services.

As no previous astrological knowledge is needed, even non-astrologers will find evaluating an A*C*G Map easy to do.
